

WiMacTel

Global Calling Card Services

WiMacTel has provided in excess of 500,000 calling cards to ILEC, CLEC, ISP and Enterprise customers.

Telco's can continue to provide calling cards to their subscribers while leaving the administration and management to WiMacTel.

The calling card service is available to subscribers 7x24 via an automated multilingual IVR with live operators as backup. WiMacTel's network, platforms and call centres are hardware, network and geographic redundant providing 99.999% availability. All connectivity options are supported via dedicated SS7, MPLS, SIP-WAN, SIP-IPSEC VPN, CAS MF, Toll Free and DID. Secure file delivery includes EMI, AMA, Proprietary and others.

Telco sets the subscriber rates. WiMacTel can terminate the calls or they can be returned to our customer's network for termination. Daily usage files are provided for subscriber billing.

Migration services from an existing calling card is available. Existing calling card access numbers and PIN's are integrated.
