SECTION 3 - SERVICE DESCRIPTIONS AND RATES, (CONT'D.)

3.2 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call.

3.2.1 The customer's monthly usage charges for Carrier service are based upon the total number of minutes use by the customer and the service options subscribed to. Chargeable time begins when a two way communication is established between the calling party and the called party or PBX. Chargeable time ends when either party "hangs up."

3.2.2 Chargeable time for all calls ends when one of the parties disconnects from the call.

3.2.3 Minimum call duration for billing purposes is one minute unless otherwise specified in the individual rate schedules of this rate sheet.

3.2.4 Calls are measured and billed in one minute increments unless otherwise indicated in this rate sheet. Any partial minute is rounded up to a full minute.

3.2.5 There is no billing applied for.

(A) Carrier will not knowingly bill for uncompleted calls.

(B) Carrier will provide full credit for any call of one minute or less upon being informed by a customer that the call was not completed.

(C) An uncompleted call includes, but shall not be limited to:

(1) calls terminating in an intercept recording, line intercept operator or a busy tone; or

(2) calls that do not answer.

(D) An uncompleted call does not include calls using busy line interrupt, -line -status verification or directory assistance services.

SECTION 3 - SERVICE DESCRIPTIONS AND RATES, (CONT'D.)**3.3 Calculation of Distance**

For services which are distance sensitive, usage charges are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by Telcordia, in the following manner:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

3.4 Time of Day Rate Periods

For time of day sensitive services, the appropriate rates apply for day, evening and night/weekend calls based on the following chart:

	MON	TUES	WED	THUR	FRI	SAT	SUN
8:00 AM to 4:59 PM	DAYTIME RATE PERIOD OR PEAK RATE PERIOD						
5:00 PM to 10:59 PM	EVENING RATE PERIOD OR OFF PEAK RATE PERIOD					EVE	
11:00 PM to 7:59 AM	NIGHT/WEEKEND RATE PERIOD OR OFF PEAK RATE PERIOD						

3.4.1 Day, Evening, and Night/Weekend times are determined by the local time of the location of the calling service point. Chargeable time for a rate period (e.g. 8AM-5PM) begins with the first stated hour (8AM) and continues to, but does not include, the second stated hour (5PM). The rate applicable at the start of chargeable time at the calling station applies to the call during the duration of the call that is applicable to that time period. If a call begins in one discount period and ends in another, the initial period discount applied is the discount in effect at the time the call is established. The charge for each additional minute of usage is the additional minute billing rate of the rate period in which the beginning of each minute occurs.
