SECTION 3 - DESCRIPTION OF SERVICE & RATES

3.1 Timing of Calls

- 3.1.1** Long distance charges are based on the duration of each call.
- 3.1.2** The standard minimum call duration period for billing purposes is one (1) minute. Usage after the initial period is measured and rounded to the next higher full minute for billing purposes.
- 3.1.3** The Company will not bill for unanswered calls. When an End User indicates that he/she was billed for an incomplete call, the Company will reasonably issue credit for the call.

SECTION 3 - DESCRIPTION OF SERVICE & RATES, (CONT'D.)**3.2 Determination of Mileage**

Usage charges for mileage sensitive services vary based on the type of service subscribed to by the Customer. For services utilizing switched access, mileage measurements for rate schedules are based on the distance in airline miles between rate centers associated with the originating and terminating stations. For services utilizing dedicated access, mileage measurements for rate schedules are based on the distance in airline miles between the Company network access point associated with the station utilizing Dedicated Access Origination/Termination and the rate center associated with the called/calling station.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by Telcordia, in the following manner:

Step 1: Obtain the "V" and "H" coordinates for the serving wire center or network access point serving the Customer's location and the called/calling station.

Step 2: Obtain the difference between the "V" coordinates. Obtain the difference between the "H" coordinates.

Step 3: Square the differences obtained in Step 2.

Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating locations of the call.

Formula =

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$
